Introduction to this Guide

This chapter provides information about what is contained in the *vFoglight System Requirements and Platform Support Guide*. It also provides information about the vFoglight documentation suite and Vizioncore.

This chapter contains the following sections:

About vFoglight....6
About this Guide....6
vFoglight Documentation Suite....6
Text Conventions....9
About Vizioncore Inc....9

About vFoglight

vFoglight helps IT organizations understand the virtual infrastructure by managing the relationships and interaction between all the components in the environment, including data centers, data stores, clusters, resource pools, hosts and virtual machines. With vFoglight, administrators can quickly determine the root-cause of an incident or problem, track virtual machine (VM) movements and understand their impact, and identify contention for resources between virtual machines.

About this Guide

This *System Requirements and Platform Support Guide* contains information on the Windows hardware requirements for vFoglight v.5.2.4. Please review the information in this guide before installing the vFoglight Management Server.

This guide is organized as follows:

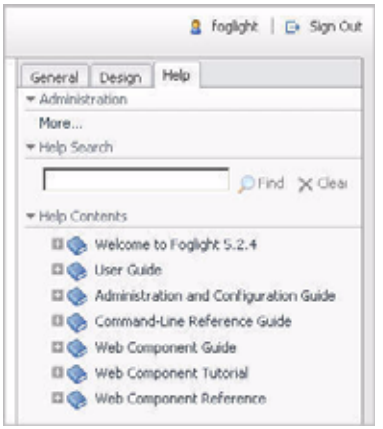
Chapter 1, Hardware Requirements and Guidelines—This chapter outlines the current Windows hardware requirements (CPU type, RAM and Storage) for 32- and 64-bit installations of the vFoglight Management Server and for the database repository. It also includes the requirements for the Java Runtime Engine.

Chapter 2, Supported Platforms—This chapter outlines the platform requirements for the vFoglight Management Server and a list of supported web browsers

vFoglight Documentation Suite

The vFoglight documentation suite is made up of the core documentation set, plus the documentation set for each vFoglight cartridge that you deploy. Documentation is provided in a combination of online help, PDF and HTML.

- **Online Help:** You can open the online help by selecting the Help tab from vFoglight's action panel.



- **PDF:** The *Getting Started Guide*, *What's New Guide*, *System Requirements and Platform Support Guide*, *Installation and Setup Guide* set, *Administration and Configuration Guide*, *vFoglight User Guide*, *Command-Line Reference Guide*, *Web Component Guide*, and *Web Component Tutorial*, are provided as PDF files. The PDF guides are included in the zip file downloaded from Vizioncore. Adobe® Reader® is required.
- **HTML:** Release Notes are provided in HTML.

Core Documentation Set

The core documentation set consists of the following files:

- *Release Notes* (HTML)
- *Getting Started Guide* (PDF)
- *What's New Guide* (PDF)
- *System Requirements and Platform Support Guide* (PDF)
- *Installation and Setup Guide* set (all in PDF format):
  - Installation and Setup Guide—*Installing on Windows with an Embedded MySQL Database*
  - Installation and Setup Guide—*Installing on Windows with an External MySQL Database*

    - Installation and Setup Guide—*Installing on Windows with an External Oracle Database*
- *Administration and Configuration Guide* (PDF and online help)
- *vFoglight User Guide* (PDF and online help)
- *Advanced Configuration Guide* set
    - *Command-Line Reference Guide* (PDF and online help)
    - *Web Component Guide* (PDF and online help)
    - *Web Component Tutorial* (PDF and online help)
    - *Web Component Reference* (online help)

Cartridge Documentation Sets

When you deploy a cartridge, the documentation set for the cartridge is installed. The online help for the cartridge is integrated automatically with the core vFoglight help. When you open the help, the name of the cartridge is displayed in a top level entry within the table of contents.

Some cartridges include additional PDF guides, which may be one or more of the following: a *Getting Started Guide*, an *Installation Guide*, a *User Guide*, and a *Reference Guide*.

Feedback on the Documentation

We are interested in receiving feedback from you about our documentation. For example, did you notice any errors in the documentation? Were any features undocumented? Do you have any suggestions on how we can improve the documentation? All comments are welcome. Please submit your feedback to the following email address:

info@vizioncore.com

Please do not submit Technical Support related issues to this email address.

Text Conventions

The following table summarizes how text styles are used in this guide:

Convention	Description
`Code`	Monospace text represents code, code objects, and command-line input. This includes: • Java language source code and examples of file contents • Classes, objects, methods, properties, constants, and events • HTML documents, tags, and attributes
`Variables`	Monospace-plus-italic text represents variable code or command-line objects that are replaced by an actual value or parameter.
Interface	Bold text is used for interface options that you select (such as menu items) as well as keyboard commands.
Files, components, and documents	Italic text is used to highlight the following items: • Pathnames, file names, and programs • The names of other documents referenced in this guide

About Vizioncore Inc.

Vizioncore was formed in July 2002 as a consulting and software-development company with the mission to create easy-to-use software solutions that performed reliable and repeatable automation of datacenter functions specifically for the Citrix platform. A main corporate goal was to enable business partners to offer solutions that targeted real-world IT issues and provided the best possible installation and automation for their clients' systems.

Vizioncore's solutions have proved successful in organizations from small to mid-sized businesses to large enterprises, in a wide variety of vertical industries, including Financial Services, Government, Healthcare, Manufacturing, and High Tech. Vizioncore, Inc. can be found in offices around the globe and at www.vizioncore.com.

Contacting Dell

Note: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

1. Visit http://support.dell.com.
2. Verify your country or region in the Choose A Country/Region drop-down menu at the bottom of the page.
3. Click Contact Us on the left side of the page.Note: Toll-free numbers are for use within the country for which they are listed.
4. Select the appropriate service or support link based on your need.
5. Choose the method of contacting Dell that is convenient for you.

Hardware Requirements and Guidelines

This chapter outlines the Windows hardware requirements (CPU, RAM and disk storage) for 32- and 64-bit installations of the vFoglight Management Server and the database repository.

This chapter contains the following sections:

About vFoglight Hardware Requirements....24
Single-Tier vFoglight Hardware Requirements....24
Multi-Tier vFoglight Hardware Requirements....26

About vFoglight Hardware Requirements

The hardware needed to run vFoglight can vary widely depending on a number of factors, including:

- The number and type of agents that are being used
- The persistence and data-rollup policies
- Agent configuration settings

You should not consider doing a production implementation without conducting a proper scoping and sizing exercise with a qualified Vizioncore representative. You can arrange for a sizing analysis by contacting your Vizioncore Sales Representative. At a minimum, you will be required to provide hardware matching the specifications below.

Installation Recommendations

Running a vFoglight server requires:

- The vFoglight Management Server
- The vFoglight database repository

vFoglight runs in either a single-tier or multi-tier configuration. While these components can be installed on a single tier or on multiple tiers, it is critical to realize that the management server and database repository require separately dedicated resources to support them. To help facilitate sizing, the resources required to support each component are addressed separately.

Single-Tier vFoglight Hardware Requirements

To install vFoglight in a single-tier configuration, you must have hardware to run the vFoglight Management Server (JVM) and vFoglight database repository together. The requirements are listed below.

32-bit Platforms

The hardware requirements for a single-tier 32-bit installation of vFoglight are as follows:

CPU	4-way 2.4 GHz CPUs—one of the following: • 1 quad core • 2 dual core • 4 single core
RAM	4 GB in total: • 2.4 GB for Management Server (1.6 GB for Heap, 0.8 GB for Java Virtual Machine) • 0.8 GB for database repository • 0.8 GB for the operating system
Storage	• For Management Server: 40 GB, 7500 RPM hard disk or better • For Database Repository: 80 GB, 10000 RPM hard disk or better

Important Some 32-bit operating systems, such as Windows Server 2003 Standard Edition, have a 4 GB memory limit. Please adjust your memory allocation accordingly. Windows Server 2003 Enterprise Edition can support up to 32 GB of physical memory with the Physical Address Extension utility enabled. For more details, please see *http://msdn.microsoft.com/en-us/library/aa366778(VS.85).aspx*.

64-bit Platforms

The hardware requirements for a single-tier 64-bit installation of vFoglight are as follows:

CPU	4-way 2.4 GHz CPUs—one of the following: • 1 quad core • 2 dual core • 4 single core

RAM	12 GB in total: • 6 GB for Management Server (4 GB for Heap, 2 GB for Java Virtual Machine) • 4 GB for database repository • 2 GB for the operating system
Storage	• For Management Server: 40 GB, 7500 RPM hard disk or better • For Database Repository: 80 GB, 10000 RPM hard disk or better

Multi-Tier vFoglight Hardware Requirements

To install vFoglight in a multi-tier configuration, you must have separate hardware to run the vFoglight Management Server (JVM) and separate hardware to run the vFoglight Database Repository. The requirements are listed below.

vFoglight Management Server (32- and 64-bit Platforms)

The hardware requirements for a vFoglight Management Server tier installation are as follows:

	32-bit	64-bit
CPU	2-way 2.4 GHz CPUs - one of the following: • 1 dual core • 2 single core	
RAM	4 GB in total: • 3 GB for Management Server (2 GB for Heap, 1 GB for Java Virtual Machine) • 1 GB for the operating system	8 GB in total: • 6 GB for Management Server (4 GB for Heap, 2 GB for Java Virtual Machine) • 2 GB for the operating system
Storage	• 40 GB, 7500 RPM hard disk or better	

vFoglight Database Repository (32- and 64-bit Platforms)

The hardware requirements for a vFoglight Database Repository Server tier installation are as follows:

	32-bit	64-bit
CPU	2-way 2.4 GHz CPUs - one of the following: • 1 dual core • 2 single core	
RAM	3 GB in total: • 2 GB for database repository • 1 GB for the operating system	6 GB in total: • 4 GB for the database repository • 2 GB for the operating system
Storage	• 80 GB, 10000 RPM hard disk or better	

3

Supported Platforms

This chapter outlines the platforms supported for the vFoglight Management Server and database repository, supported platforms for the vFoglight Agent Manager and requirements for other software used with vFoglight.

This chapter contains the following sections:

Supported Platforms for the vFoglight Management Server 30
Supported External Databases 31
Supported Web Browsers 32
Supported Report Viewer 33

Supported Platforms for the vFoglight Management Server

Vizioncore supports the platforms listed in the following table. These platforms have passed quality assurance testing with vFoglight.

Note vFoglight is licensed for open systems only, in accordance with the supported platform matrix.

Operating System	Version	Architecture	Additional Details
Microsoft Windows®	Server 2003	x86	32-bit support
		x86_64	32-bit and 64-bit support

Important The vFoglight Management Server requires a Java Runtime Environment (JRE) to run. Please see “Operating System Patch Requirements for the JRE” on page 32 for JRE and operating system patch requirements.

Supported External Databases

The vFoglight Management Server requires a database repository. You have the option of using the embedded database included with vFoglight, or using an external database.

The external database must be a supported platform and version. Customers are responsible for the procurement, installation, and management of an external database.

The following table outlines the external databases supported for vFoglight 5.2.4. These versions are supported for any platform supported for the vFoglight Management Server.

Database	Supported Versions
Oracle	• Oracle 9i R2 (9.2.x branch)
	• Oracle 10g R2 (10.2.x branch)
MySQL	• 5.0.x branch, with 5.0.27 as the minimum allowed version

While you can run your external database on any operating system platform supported by your database vendor, Vizioncore will only support database issues that can be reproduced on the following OS platforms (32- or 64-bit):

Operating System	Version
Microsoft Windows®	Server 2003
RedHat® Enterprise Linux®	AS/ES 5
IBM AIX®	5.3
HP-UX®	11i v2
Sun Solaris™	10

Operating System Patch Requirements for the JRE

The vFoglight Management Server and the vFoglight Agent Manager require a Java Runtime Environment (JRE). In order for vFoglight to run properly, it requires that the operating system is at a minimum patch level to support our JRE.

Please ensure that your OS is properly patched for the JRE. It is recommended that you check with your OS vendor for the latest patches for your platform.

The vFoglight Management Server must be patched to support Java 1.6.

Monitored hosts must be patched to support Java 1.5.

Supported Web Browsers

The following table lists the Web browsers supported for use with vFoglight 5.2.4.

Note that you must use the latest patch release for the browsers.

Browser Type	Operating System
Internet Explorer 6 and 7	Windows XP
	Windows 2003
	Windows Vista (IE 7 only)
Firefox 2 and 3	Windows XP
	Windows 2003
	Windows Vista
	Linux RedHat, SuSE **Note** Firefox 3 is only supported on Desktop Linux—Enterprise Linux is not supported.

Supported Report Viewer

To view PDF reports in vFoglight, Adobe Acrobat Reader version 7.0.9 (or higher) is preferred.
